

Malignant epithelium: LYPLA1 / LYPLA2 and fixed PC-remodelling score
One dot per source donor; score excludes both comparison genes

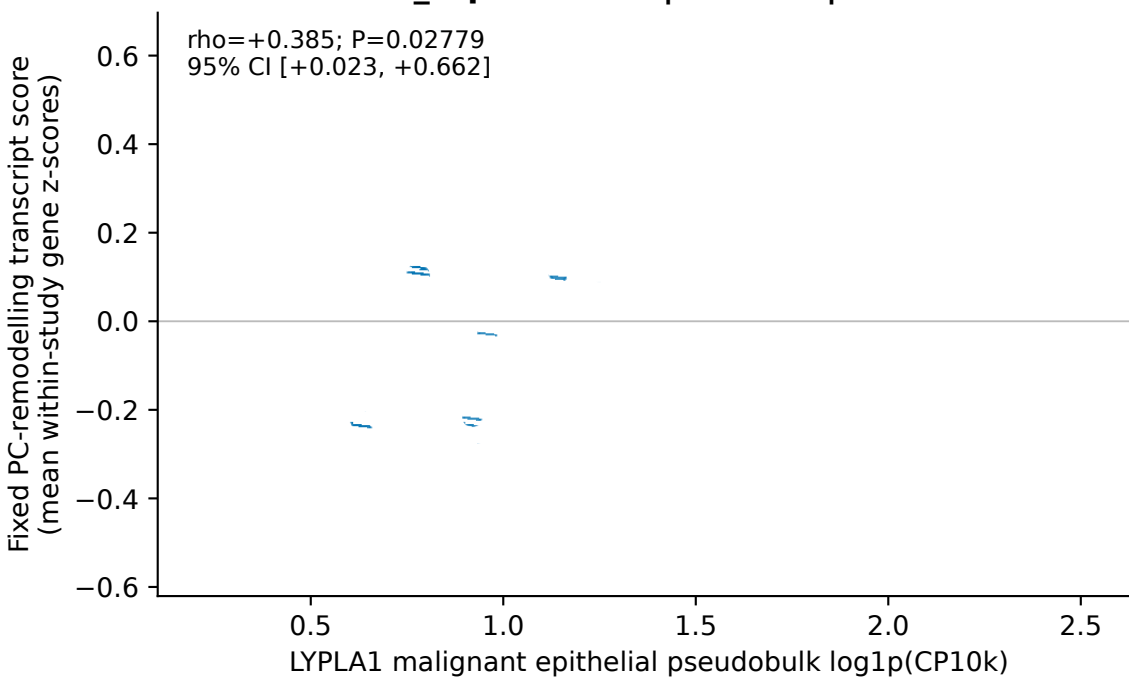

Wu2021 | LYPLA1 | 20 donors

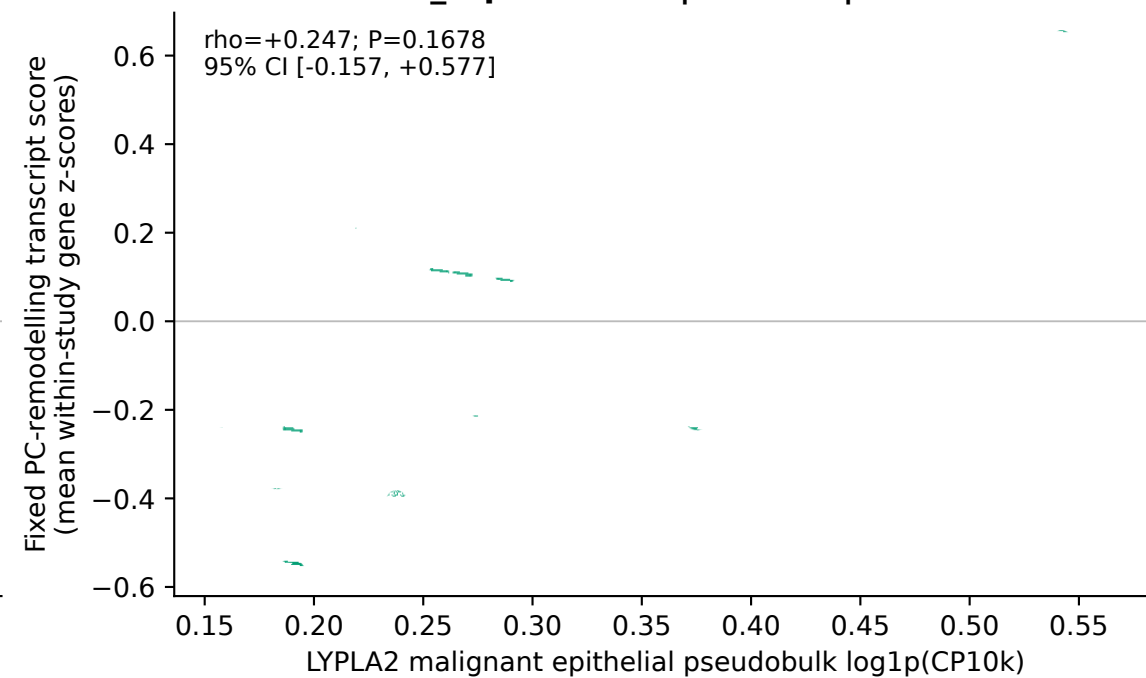

Wu2021 | LYPLA2 | 20 donors

Pal2021_reprocessed | LYPLA1 | 33 donors

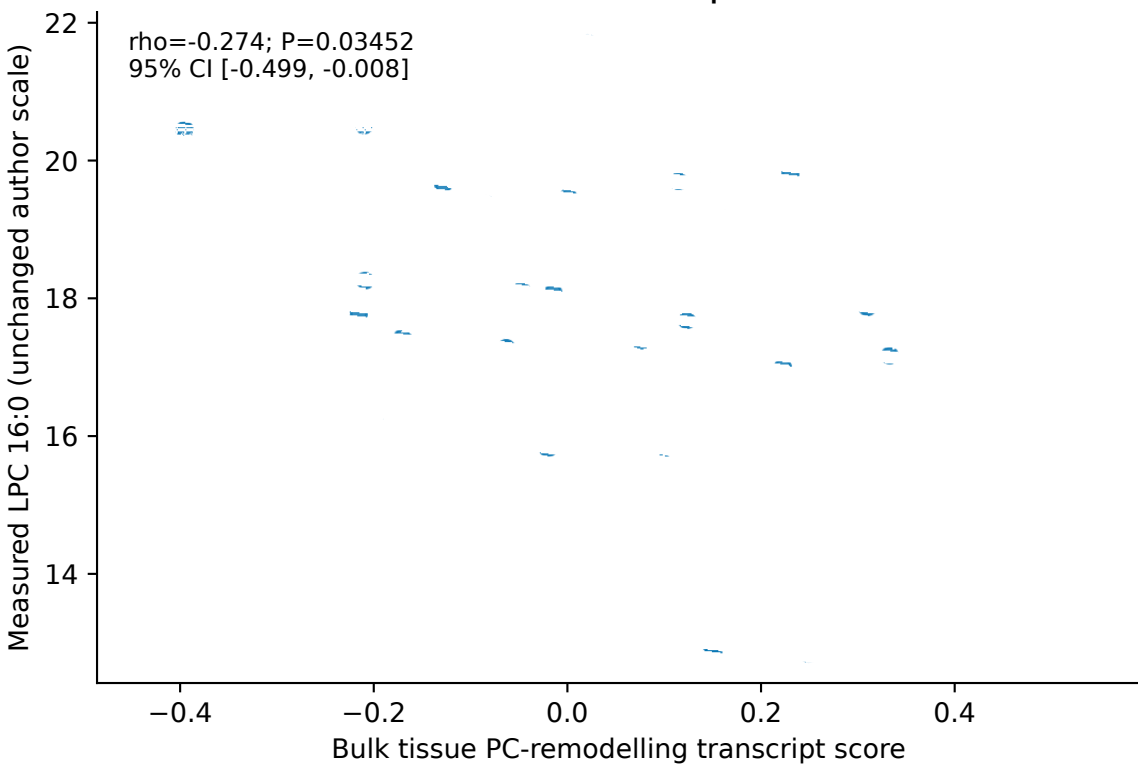

Pal2021_reprocessed | LYPLA2 | 33 donors

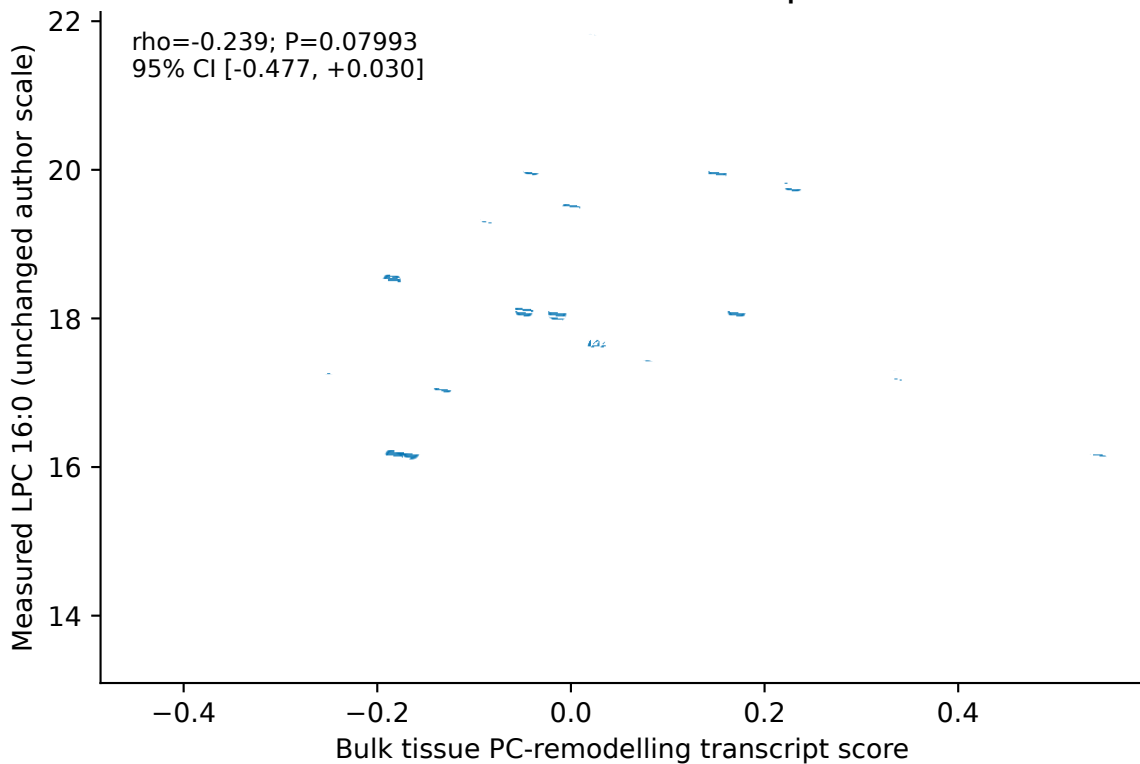

CAMP: the same fixed gene set versus measured LPC 16:0

Bulk tissue score is not malignant-cell lipid abundance or metabolic flux

Processed main | n=60

Author-available subset | n=55

All eight prespecified tests | nominal P for exploratory retention
CAMP ER_PC12 adjusts ER and composition proxy PCs; q archived in complete table
